MINI ULTRASONIC CLEANER 100005

The Mini Ultrasonic Cleaner is designed to remove grease, dust or other contaminants from surfaces and cavities of small objects, parts and samples such as cuvettes, lenses, glassware, stainless steel instruments, metals and more. Simply place objects directly into the stainless steel tank or into the dipping basket (included), replace the transparent lid and press "on". The ceramic chip generates thousands of minute cleansing bubbles which vibrate at a very high electrical frequency. When the vibration speed rises above the ultrasonic frequency level, bubbles explode and generate strong power, cleaning the surfaces and cavities of hard-to-clean objects. Your samples will be clean in 3 minutes after which the unit will shut off automatically. Ultrasonic cleaning does not scratch the surface or harm objects like many chemical or abrasive cleansers. AC 100/110V.

Tank Dim: 168 x 89 x 53mm (6.6 x 3.5 x 2 in). Weight: 900g (32 oz) Capacity: 600ml (20.3 oz).
