Introducing RaPET® – The Next Step.
Stanbio’s Rapid Particle Enhanced Technology.
A complete line of highly sensitive and specific serology products.

Stanbio Laboratory continues its nearly 40 years of providing high quality diagnostic products to the clinical laboratory. To this end we offer a complete line of highly sensitive and specific serology products. Our line of RaPET® (Rapid Particle Enhanced Technology) latex products produce easy-to-read results in as little as 2 minutes. All procedures feature “No Dilution” technology which eliminates the need to pre-dilute patient specimens. Use of color-coded reagents and dropper caps help to further reduce the chance of errors. All RaPET® assays utilize the same quantitative testing procedure for the added convenience of using the same patient serial dilution for all RaPET® assays.

In addition, Stanbio offers a charcoal flocculation assay for the detection of Syphilis (RPR).

A Tri-level set of RPR/VDRL controls is available for VDRL users and other brands of RPR kits.

All Stanbio test kits come complete with test slide(s), pipette/mixers, and controls to assure accurate test results. An easy to use work sheet for documenting semi-quantitative results is also included.

The RaPET® Line

RaPET® ASO
• Latex agglutination slide test for the determination of Antistreptolysin-O in serum
• Obtain Qualitative or Semi-Quantitative Results
• Positive/Negative Control Included
• Results in 2 minutes
  50 Test  Cat. No. 1125-050
  100 Test  Cat. No. 1125-100

RaPET® CRP
• Latex agglutination slide test for the determination of C-Reactive Protein in serum
• Obtain Qualitative or Semi-Quantitative Results
• Positive/Negative Control Included
• Results in 2 minutes
  50 Test  Cat. No. 1130-050
  100 Test  Cat. No. 1130-100

RaPET® IM
• Latex agglutination slide test for the detection of heterophilic antibodies associated with infectious mononucleosis
• Obtain Qualitative or Semi-Quantitative Results
• Positive/Negative Control Included
• Results in 3 minutes
  50 Test  Cat. No. 1145-050
  100 Test  Cat. No. 1145-100

RaPET® RF
• Latex agglutination slide test for the determination of Rheumatoid Factors in serum
• Obtain Qualitative or Semi-Quantitative Results
• Positive/Negative Control Included
• Results in 2 minutes
  50 Test  Cat. No. 1155-050
  100 Test  Cat. No. 1155-100

RaPET® s-LE
• Latex agglutination slide test for the determination of Anti-DNP associated with Systemic Lupus Erythematosus in serum
• Obtain Qualitative or Semi-Quantitative Results
• Positive/Negative Control Included
• Results in 3 minutes
  50 Test  Cat. No. 1160-050

RPR Quicktest
• Charcoal flocculation slide test for the determination of Reagin Antibodies associated with Syphilis in serum
• Obtain Qualitative or Quantitative Results
• Controls Included - Reactive, Weakly Reactive and Non-Reactive
• Complete test kit includes pipette/stirrers, dispensing needle, dispensing bottle and 18mm circle test cards
• Results in 8 minutes
  100 Test  Cat. No. 1170-100
  500 Test  Cat. No. 1170-500

Syphilis Tri-level Controls
• For use as quality control material in RPR/VDRL Test Procedures
• Liquid, ready-to-use controls
• Contains - Reactive, Weakly Reactive and Non-Reactive levels
  3x 5 mL  Cat. No. 1175-305

DISTRIBUTED BY: Stanbio Laboratory, Inc. • 2930 East Houston Street • San Antonio, Texas 78202 • Fax: (210) 227-6367 or visit our website at: www.stanbio.com
